About Me

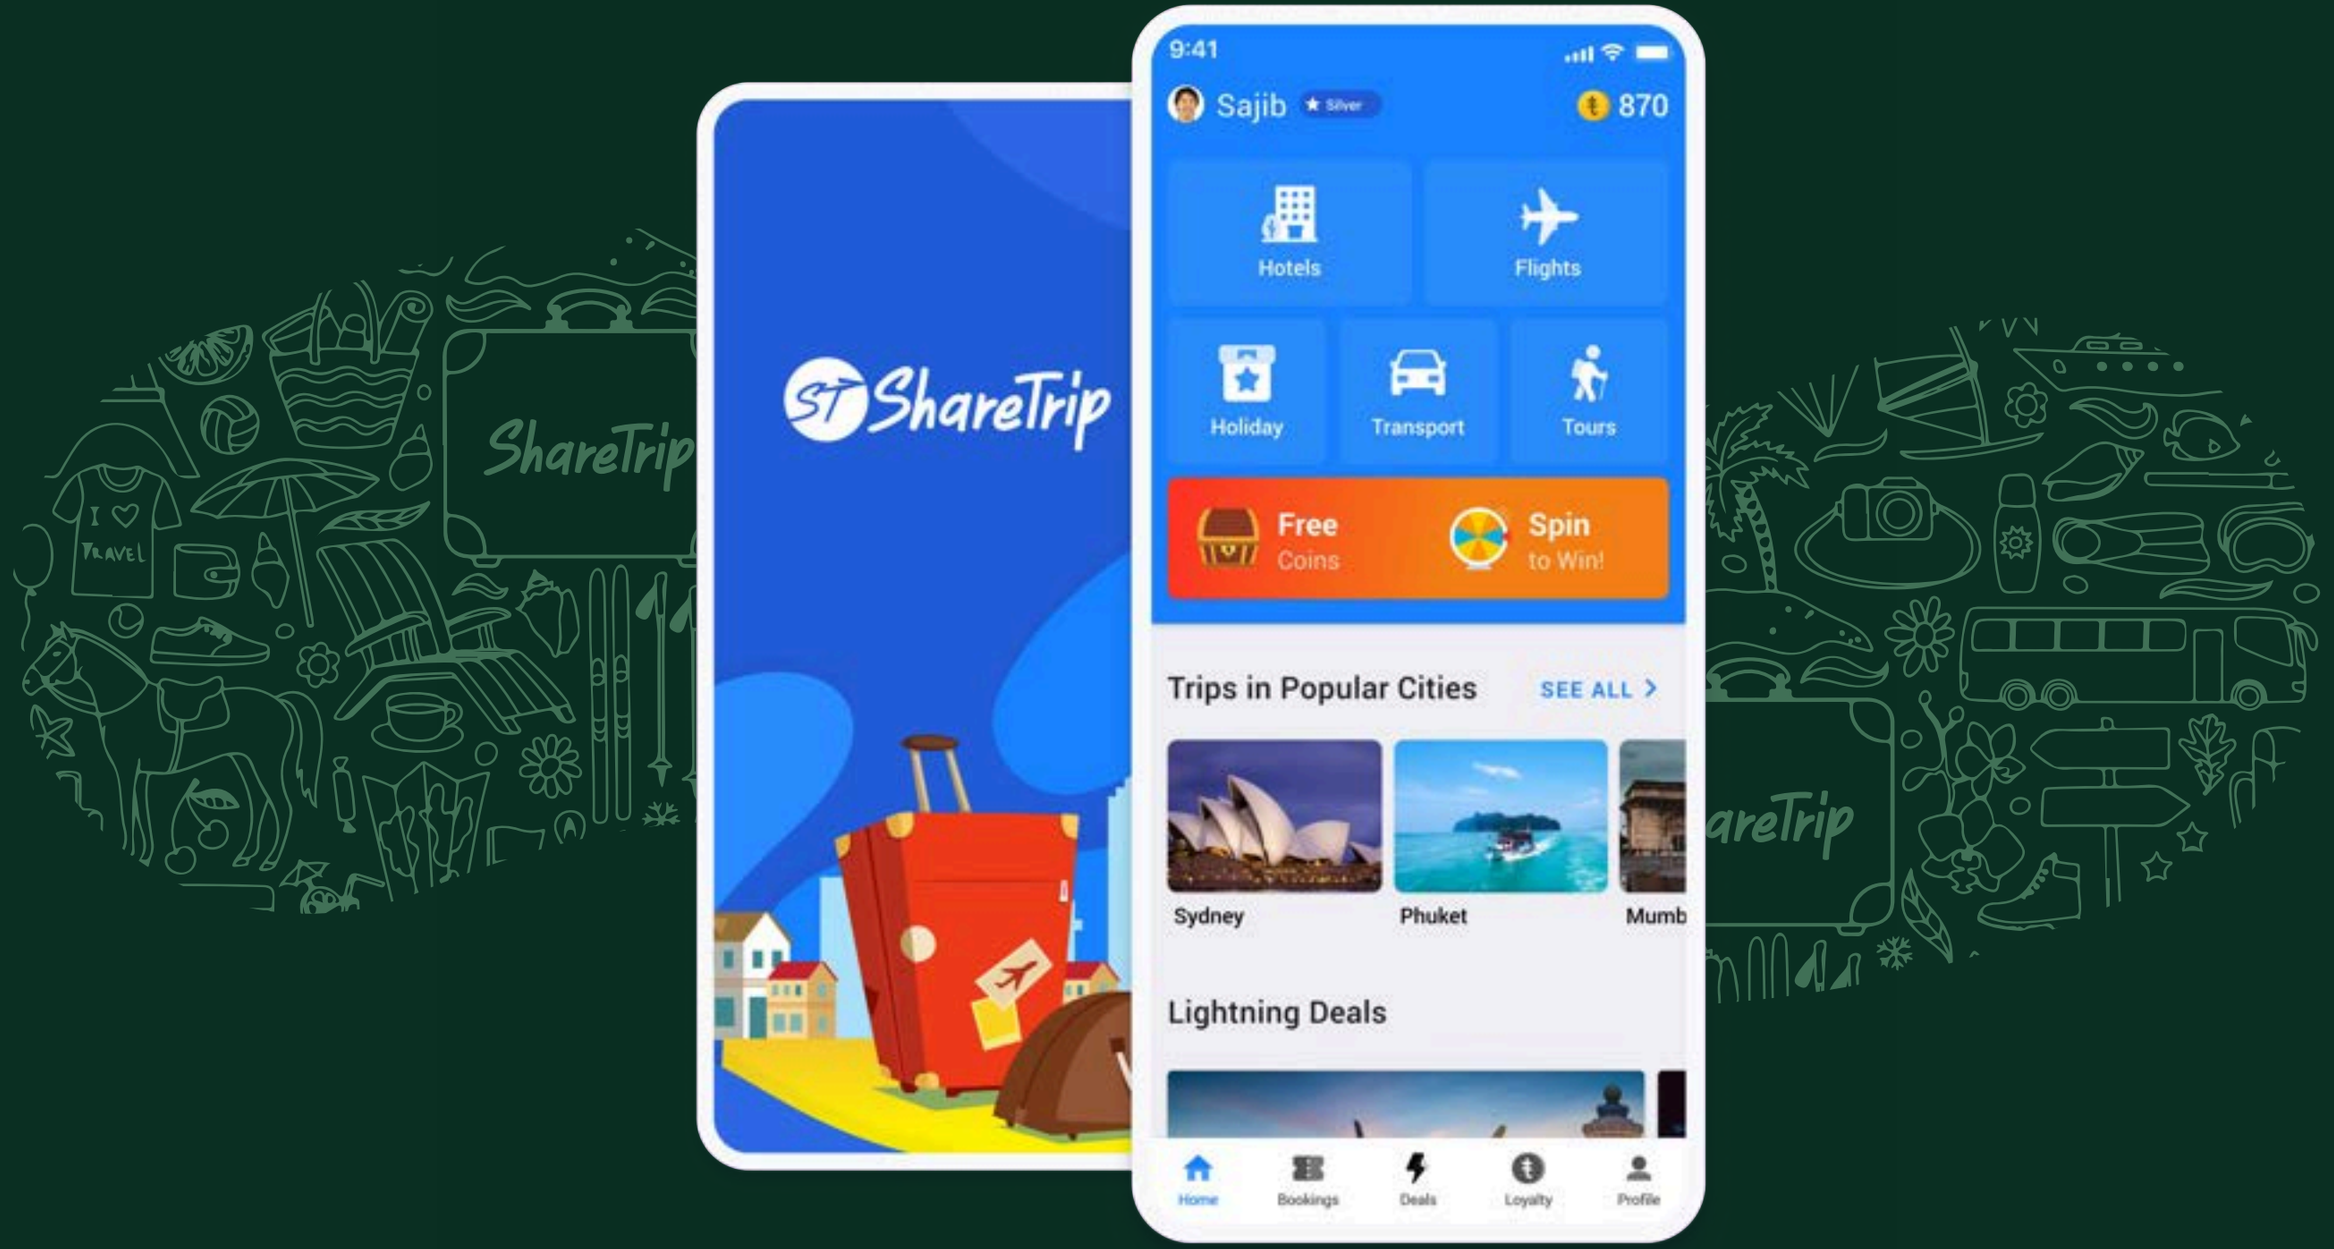

Profile

I'm a Product Designer with more than 8 years of working experience building bridges between business, technology, and human.

- I've helped startups and product-driven companies to build **8 mobile apps, 15 web applications**, and 35 websites.
- I believe in design practice that is data-informed and driven by empathy.
- I'm passionate about balancing complex business requirements, and user needs through a user-centered design process.

Sample of the products and companies I have worked with:

ShareTrip · Truck Lagbe · Jobike · Curogram · workd · pimjo · Ayro UI · G&R · Lineicons · themexpert · Beatnik · BERGER Trusted Worldwide · BENGAL MEAT · BURGER KING BANGLADESH

My Journey to

ShareTrip

I led the most talented team of 5+ designers and designed functional and useable products for the current 2M+ & future billion users through the **2 mobile apps, 1 B2B portal, 1 admin portal** and **1 SAAS platform**.

- Collaborated & coordinated with engineers, and other stakeholders, created a seamless and intuitive booking experience with about 86% success rate.
- Facilitated the team in developing and maintaining the design system, implementing the design process to increase team productivity by around 25%.

Designing Travel App Experience from Scratch

Project

ShareTrip Mobile Application

Timeline

October 2018 - March 2019

My Role

UX Research, UI/UX Design

Tools

Miro, Adobe XD, Zeplin, Figma, Notion.

Platform

iOS and Android.

Team Collaboration

Product, Marketing, Sales, Customer Support, and Tech.

Background

ShareTrip is the pioneer online travel aggregator (OTA) in Bangladesh. Initially, it was providing offline flights, hotels, and holiday package booking services.

Design Challenge

Our challenge was to design Android and iOS mobile applications from scratch, ensuring functionality, simplicity, intuitiveness, easy-to-use, conversion-friendly, and frictionless booking experience.

Outcome

- The success rate was 76% in the booking experience.
- 55% of the users revisit.
- Our online booking was increased by 25%.

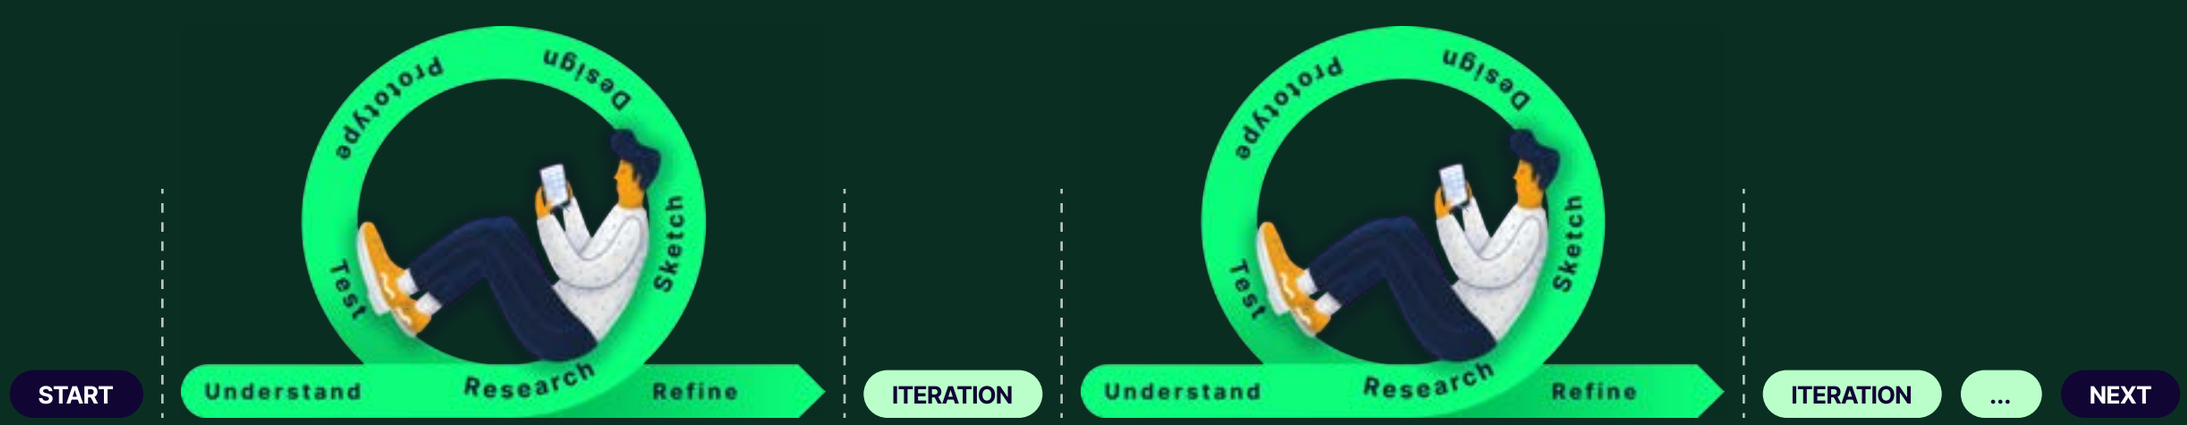

UX Research

Process

Design Thinking & Lean UX Design

I help the team to choose a mixed approach of Design Thinking and the Lean UX design process.

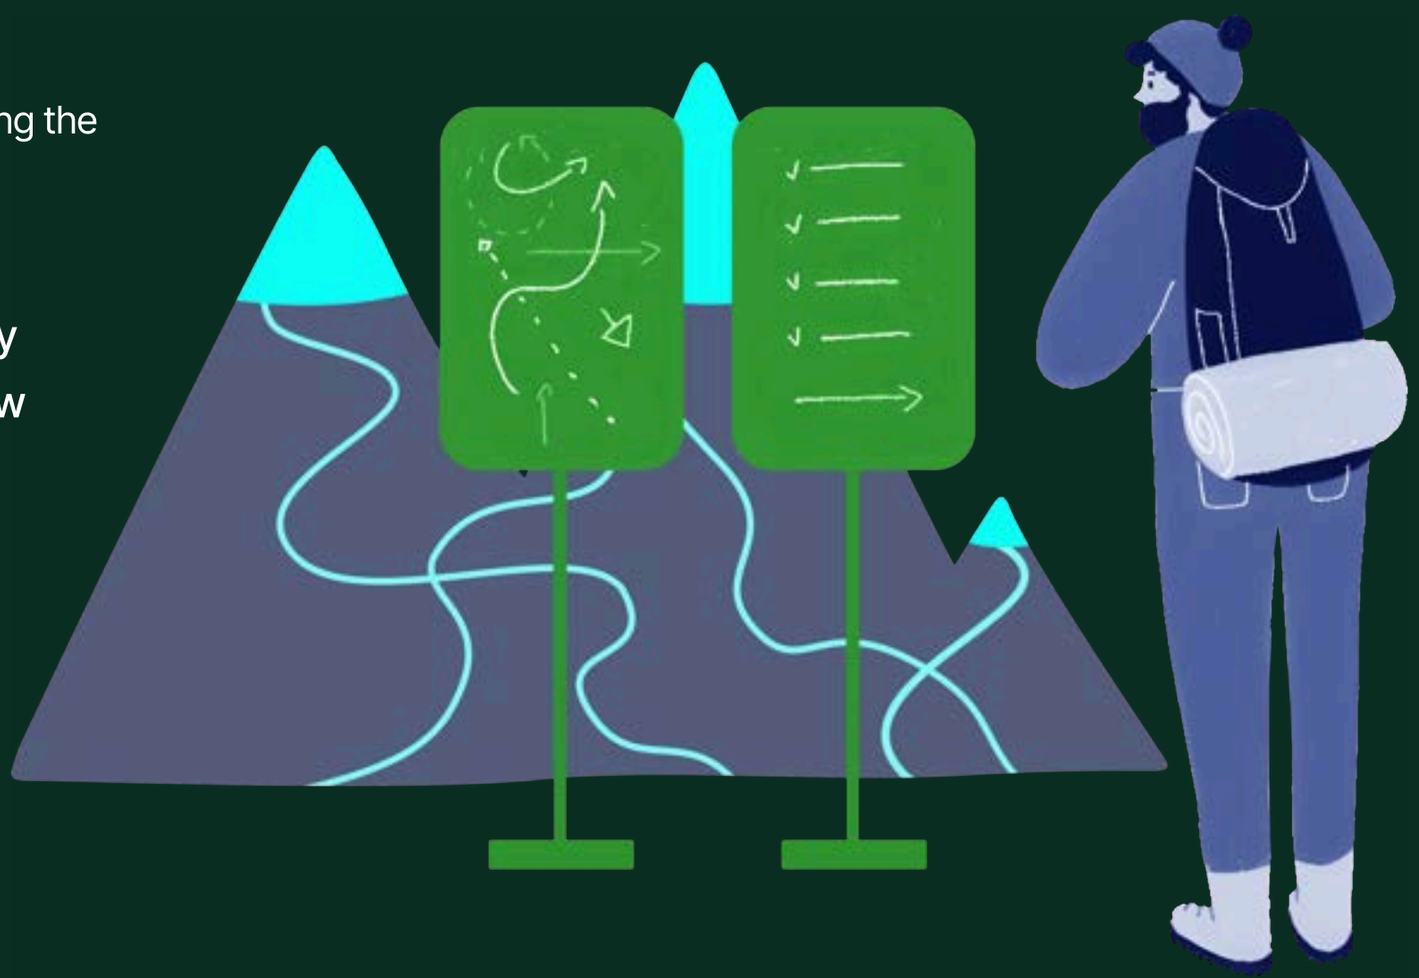

UX Research

Understand

I have no ideas about the travel industry!

So I started seeking answers to my questions, understanding the end goal from users and business perspectives

- What does the product do?
- Who is the audience? Where they live, what they think, like & do? Where / When / How / Why /How often do they use it?
- What are the business goals?
- Do the business goals support the user goals?

UX Research | Understanding

Findings

I asked questions to 30 people of different ages, occupations, categories.

Out of which 48.5% were males, and 51.5% were females. They are mainly from **20-55 years of age**. Collaboratively I worked with our product, engineering, marketing, sales, and customer support teams.

The insigths from the answers of those questions were interesting.

UX Research | Understanding

Findings

How often do you travel

- 1 time a year
- 2-3 times a year
- 4-5 times a year
- 5-6 times a year
- 6+ times a year

Age Groups

- 20-29 (40%)
- 30-39 (16,7%)
- 40-45 (23.3%)
- 46-59 (13.3%)
- 50-55 (6.7%)

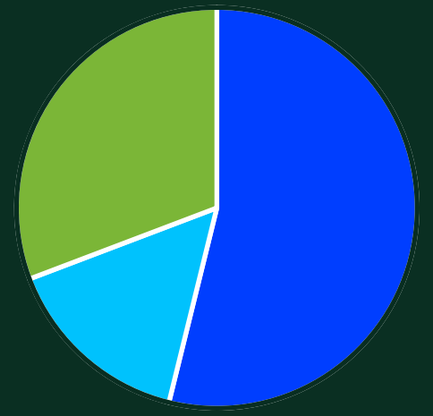

Participants varied in age which played a factore in some of the research results from the answers given

Main motivation for travelling

Age Group: 20-45

- Discovering New Places (38.7%)
- Business Trips (32.33%)
- To Get Away (12.9%)
- Rest & Relaxation (6.5%)
- Others (9.7%)

Age Group: 46-55

- Rest & Relaxation (30.8%)
- Discovering New Places (15.4%)
- Others (9.7%)

UX Research | Understanding

Findings

Do you think you would enjoy the experience of having a travel expert plan an entire trip for you? Why or why not?

Participant #5 | Age 32 | Male

Unlikely, I wouldn't mind receiving a plan from an expert. I would appreciate time to explore more on my own.

Participant #5 | Age 25 | Female

No, we like the freedom of planning our own travels and don't enjoy the constraints of a trip planned by someone else. It usually doesn't allow any spontaneity during the trip.

Participant #9 | Age 45 | Male

Yes, because they would have a lot more experience than me. It would save me a lot of time.

UX Research I Empathize I User Persona & Empathy

Mehedee Hasan

Age: 28 Years
Profession: Software Engineer
Family: Wife
Travel in last year: 2 times

Bio

He is not a very frequent traveler, but he looks for relaxing trips with family. He prefers to choose cheapest flights as well as the nearest hotel from the destinations. Also, make a comparison between offers he gets.

How often do you book flight and hotel?

1-2 times in a year

What do to look for while planning a trip?

- Recommendations for lowest fares (85%)
- Save money (75%)
- Comfort (70%)
- Clearity in information (100%)

Goal

- Find cheapest filight in less time
- Recommendation about hotel and places
- Easy to communicate

Frustration

- Got stuck while adding personal info
- No clear communication on meal, extra luggage, seat selection, etc.

Doing

- Asks his friends for recommendations.
- Reads reviews from other travelers.

Seeing

- Look at his favorite blogger's Instagram page for inspiration.
- His Hopper app alerts him that now is a good time to buy airline tickets.

Thoughts & Feeling

- How many vacation days do I have saved up? How mucch will a trip cost me?
- Do travel agents still exist?

Pains

- It's hard to coordinate my schedule and it takes me too long to plan a trip.

Gains

- I feel so refreshed and energized after vacation. I'd like to collaborate with someone to plan a trip. There are so many travel resources online that are helpful.

UX Research I Empathize

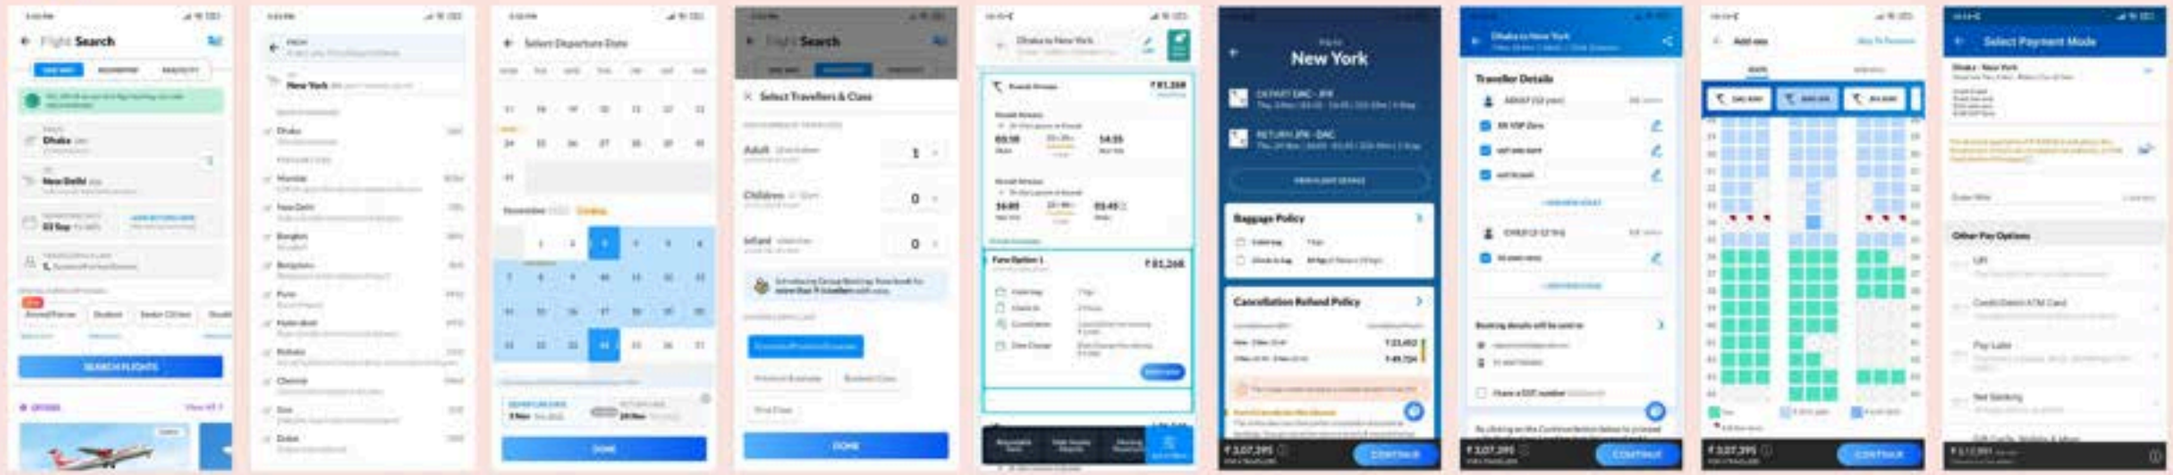

Competitors Analysis

I analyzed Make My Trip, Kayak, Agoda, Expedia, Booking.com, Rate Hawk, Hopper, Goibio, Airbnb, Skyscanner, and others popular online travel apps.

I explored their booking journey flow through platforms and visited Google Playstore, Appstore, and social media pages to know about their users.

MakeMyTrip Hotels, Flight, Bus
Ratings and reviews
A Google user
Excellent and easy to use app. However, it appears like sometimes it artificially creates a scarcity of availability to push you into closing the booking in a hurry. Which has often lead to making wrong choices or not giving enough time to understand more about the property. It would be good if it categorised bed & breakfast, lodges, hotels and resorts separately.

Horrible. The MMT black plan is just horrible. It adds points to your wallet which you can not use at all. The bonus cash however big the number shows up has a huge restriction and has an immediate expiry. The app assumes you almost fly every day and will clean up the points if no booking is done frequently.

Really sorry about the experience and we certainly do not want our users to face the inconvenience. Would request you to share the details on service@makemytrip.com along with the booking id to check the details and resolve.
A Google user
For few months I have not been able to book through mmt. Also mmtdouble black subscription could not be made. Mmt does not accept any of my cards and requests instead to try to send bank transfer or call toll free numbers. It's very time consuming and at the end frustrating. I am a frequent traveller.

A Google user
Most useless app ever. Makes you transfer to website to search flights. Website and in app price vary widely. They don't have customer support. I literally waited half and hour and still didn't get a response. Worst customer service response. They are not even worth one star. They just want money as cancellation charge and rescheduling charge is not different

Good app, but there seriously needs to be a limit on how many notifications the app sends. The rate at which the app sends notifications can only be described as viral. The developer should provide an option for the user to select what kind of notifications he wants to see, and how often.

Booking.com: Hotels and more
Ratings and reviews
A Google user
App would get 5 stars but the booking "assistant" is just terrible. Instead of directly messaging the hosts you have to write to this stupid, inefficient assistant that forwards your message. Sometimes it doesn't at all. Sometimes you wait 5 minutes until it does it. Sometimes it never stops loading. Very annoying experience. I just want to write and get a quick, simple response and don't want to check the app every 5 mins until a the message got forwarded. FAQ processing must go faster.

A Google user
I installed this while looking for good deals on hotel booking online and I must say this does a very good job. The interface is slightly cluttered but doesn't break the experience. I like the way the results are shown and the filters work great. You also get to see reviews and deals in great detail. In all, a great app to have if you're a frequent traveler.
Did you find this helpful? Yes No
A Google user
Sorting doesn't work When trying to sort search results, I always get sent back to the home/start screen of the app once I click the sort button. Hence, I can't do custom sorting in the app and often end up using the mobile website instead. Other than that, the app is great!
Did you find this helpful? Yes No
A Google user
This app is a time saver! We travel frequently and this app is a big help for us. I am given options that I would have spent hours comparing. Its easy, convenient and concise in the hotel descriptions. Everything you need to plan a trip is on this website. I wouldn't know or want to do without it!
Did you find this helpful? Yes No
A Google user
Cannot find a way to exclude dorm rooms anymore. Even if you exclude hostels in the filter a lot of dorm rooms are classified as b&b or hotels so results are still saturated with dorms meaning the price on the front screen is not representive of room cost. Makes using the app very difficult and as a result I have resorted to using an app that allows me to search and filter rooms not beds. Shame as booking was always my go to app and site.

Expedia: Hotels, Flights & Car
Ratings and reviews
A Google user
2 very irritating parts of the user experience: 1) every update, which seems to happen more than weekly, auto logs you out. It seems like every time I open this app I need to log back into it even though I haven't explicitly logged out. 2) there's no thumbnail view for a hotel's image gallery - ie you can't see them all at once in a grid format and decide which ones to view in more detail to quickly see if a hotel is suitable. This means, for some hotels, you have to swipe through 45 repetitive individual photos of the same room decor before you get to see if the outside of the building looks like it's in a dump.
Did you find this helpful? Yes No
A Google user
Expedia wants you to use the app but they do not give you the same options and capabilities as the full web site. For example, you cannot book more than one hotel room at a time. I was also unable to view previous reservations and trips once they had passed. I enjoyed having the app overall, but am considering deleting it if I keep having to use the website anyway. I don't need it taking up room on my phone if it doesn't make booking trips more convenient than the web site.
Did you find this helpful? Yes No
A Google user
I was browsing rooms and went back and forth to a specific hotel that was $82 a night. The price changed to $54/night for a split second so I tried to book it immediately. I was rushing so I didn't do the math before confirming my total. Ended up booking for full price. I cancelled my booking, so now I'll have to wait for the refund to credit back to my account. I spoke with a rep and she offered to help me confirm the price for my next booking. What a false ad!
Did you find this helpful? Yes No
A Google user
I am typically a loyal Expedia user, so I hate to give only 3 stars, however there is a problem with the "pay-at-pickup" car rental idea. If you book through Expedia this way, the car rental company feels no obligation to hold a car for you. So, basically, walking up to the counter with a "pay-at-pickup" reservation is like walking up with no reservation at all. They may not have the car you reserved or they may not have a car at all. While this isn't really Expedia's fault, I feel it's misleading for Expedia to even offer this type of car rental if the car companies aren't actually going to honor it. Please remove it from the app or improve it's reliability.
Did you find this helpful? Yes No
A Google user
The difference between the prices for flights vary hugely between the app and Expedia internet site. I was trying to book return flights from Paris to Los Angeles for 4 people and the difference in price ended up as 1200 euros difference. Also tried to book a car for the same trip and it was very expensive. I wouldn't even give this app 1 star.
Did you find this helpful? Yes No
A Google user
Recently the prices advertised are not correct. They changed immediately once you want make the booking. I tried to call them to alert associates in Expedia. I've called their twice and they gave me the

UX Research I Empathize

Hypothesis

To make the service more engaging to the users we build a Gamified Travel App system. We also introduced TripCoin, a virtual currency.

- We had used game elements and **Point Badge Leaderboard** (PBL) system.
- We came up with a wheel game, **Spin to Win** and **Treasure Chest**.

UX Design I Define

Product Feature Roadmap

I put together a product feature roadmap of the features needed and a priority list based on our goals and objectives.

Must Have:

- Users should able to do flight bookings.
- Users should be able to do hotel bookings.
- Users should be able to manage flight & hotel bookings.
- Users should be able to manage their profile.
- Users should be able to play games & earn TripCoins.
- Users should be able to redeem TripCoins as discount.
- Users should be able to make payments easily.

Nice to Have:

- Live Chat with customer care.
- Available seats, add extra baggage, seat selection, meal selection during flight bookings.
- Special request, room request during hotel bookings.
- Payment form after the booking is accepted.

... and more.

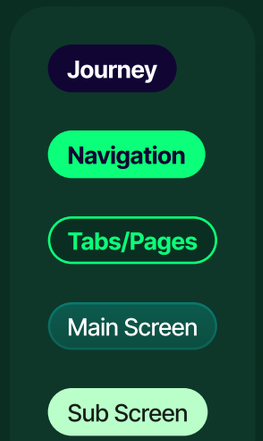

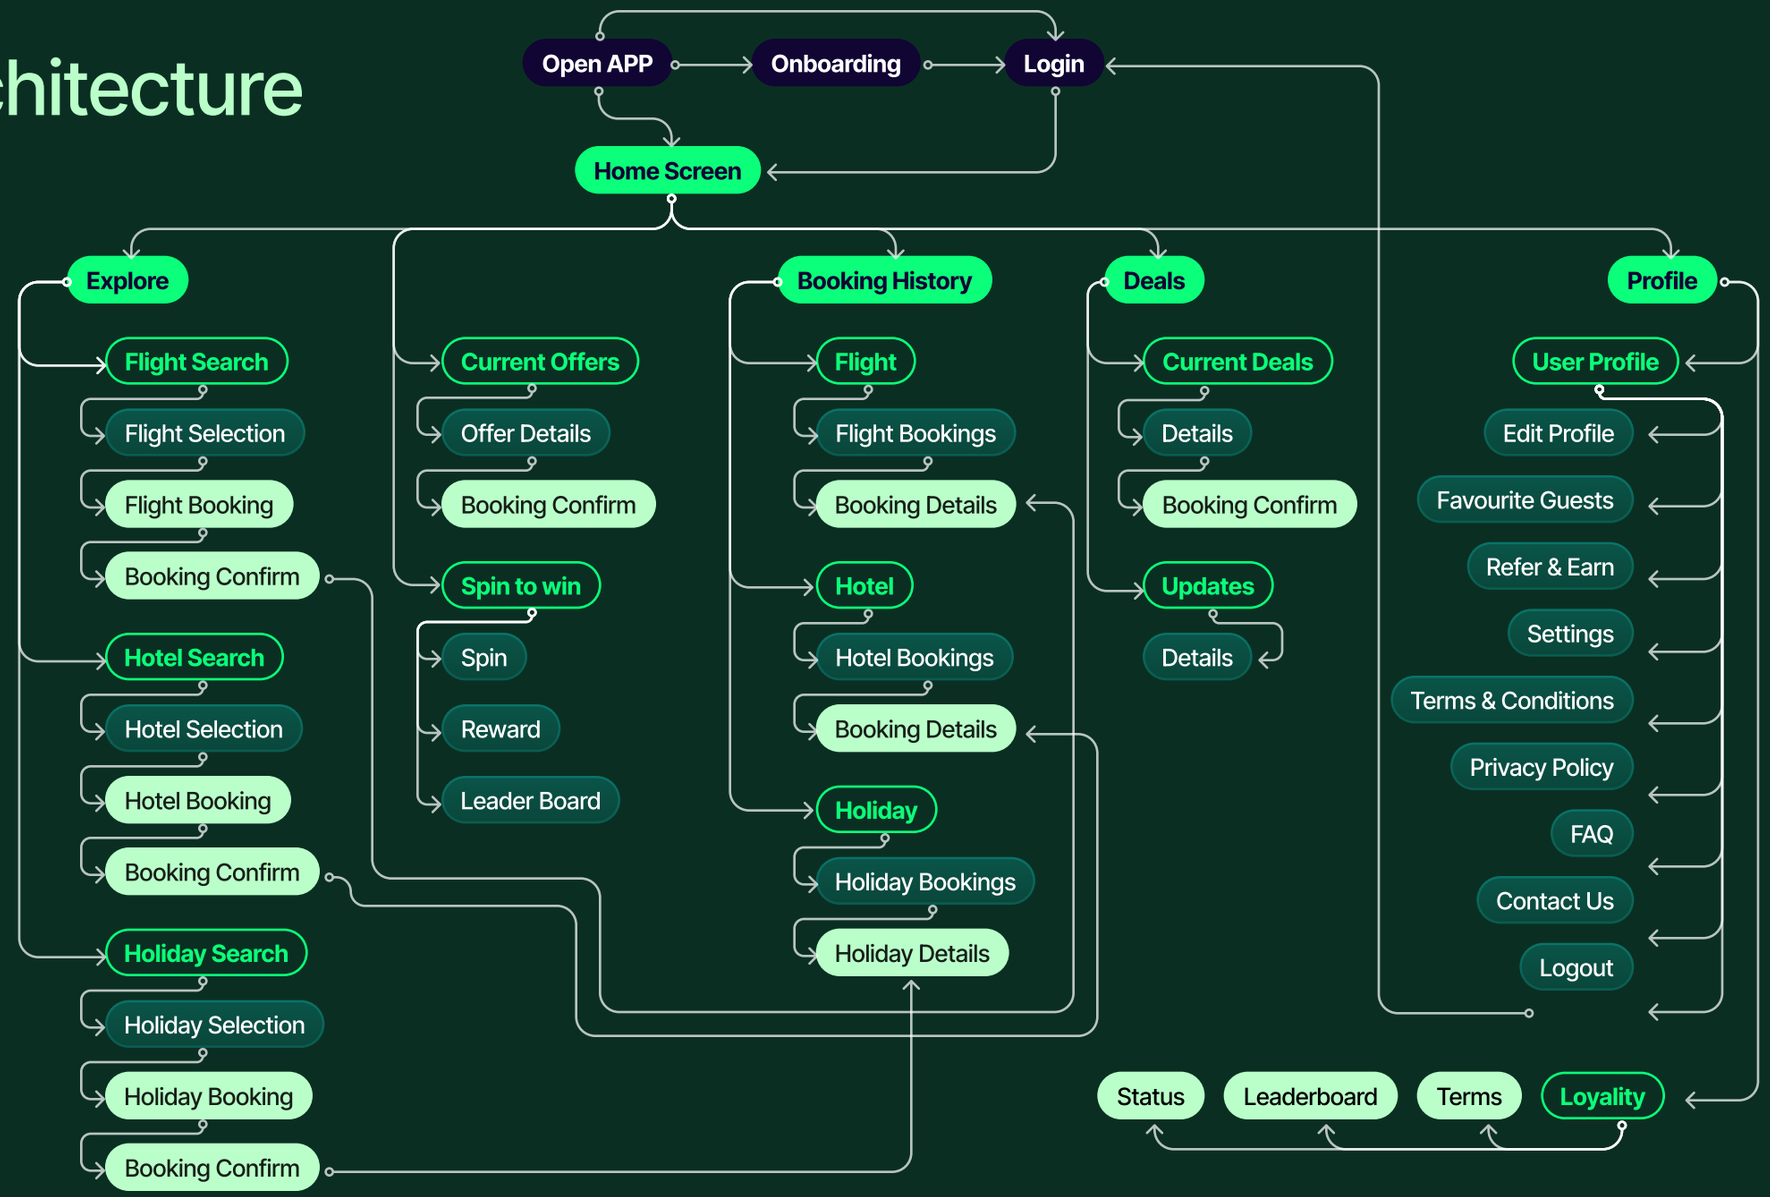

UX Design I Ideate

Wireframing & Prototyping

We created digital wireframes and built a low-fidelity prototype. Also, we conducted a series of sessions for usability testing.

It helps us to get more valuable, valid, and actionable user inputs for the app to keep the process smooth.

UX Design | Test & Validated

Testing

We invited some focus group users for usability testing sessions.

We set a list of task assigned for our participants & collect their feedback during those testing sessions.

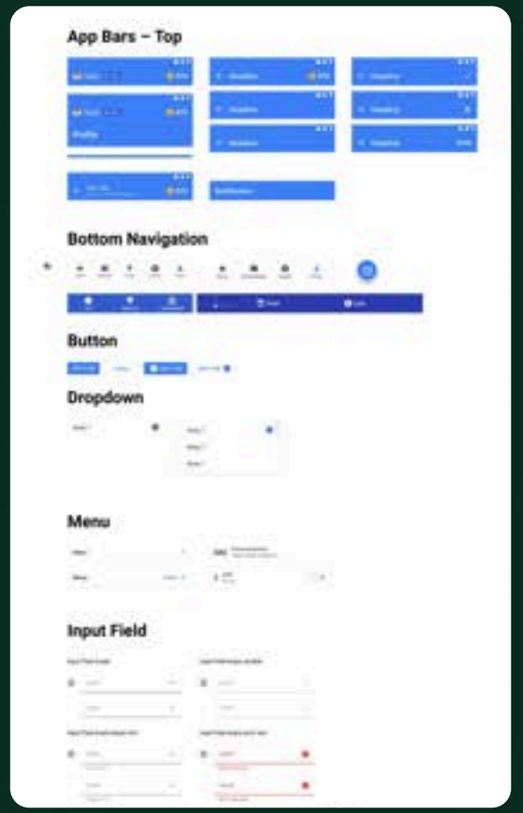

UI Design

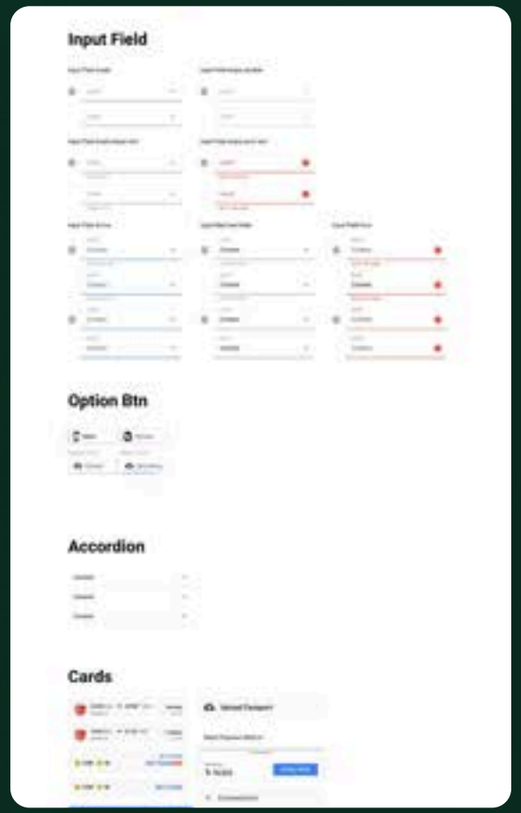

Design System

Initially, we built basic style guidelines. Afterward, we built a highly customizable design system to create a design language through all the platforms and make design more productive way.

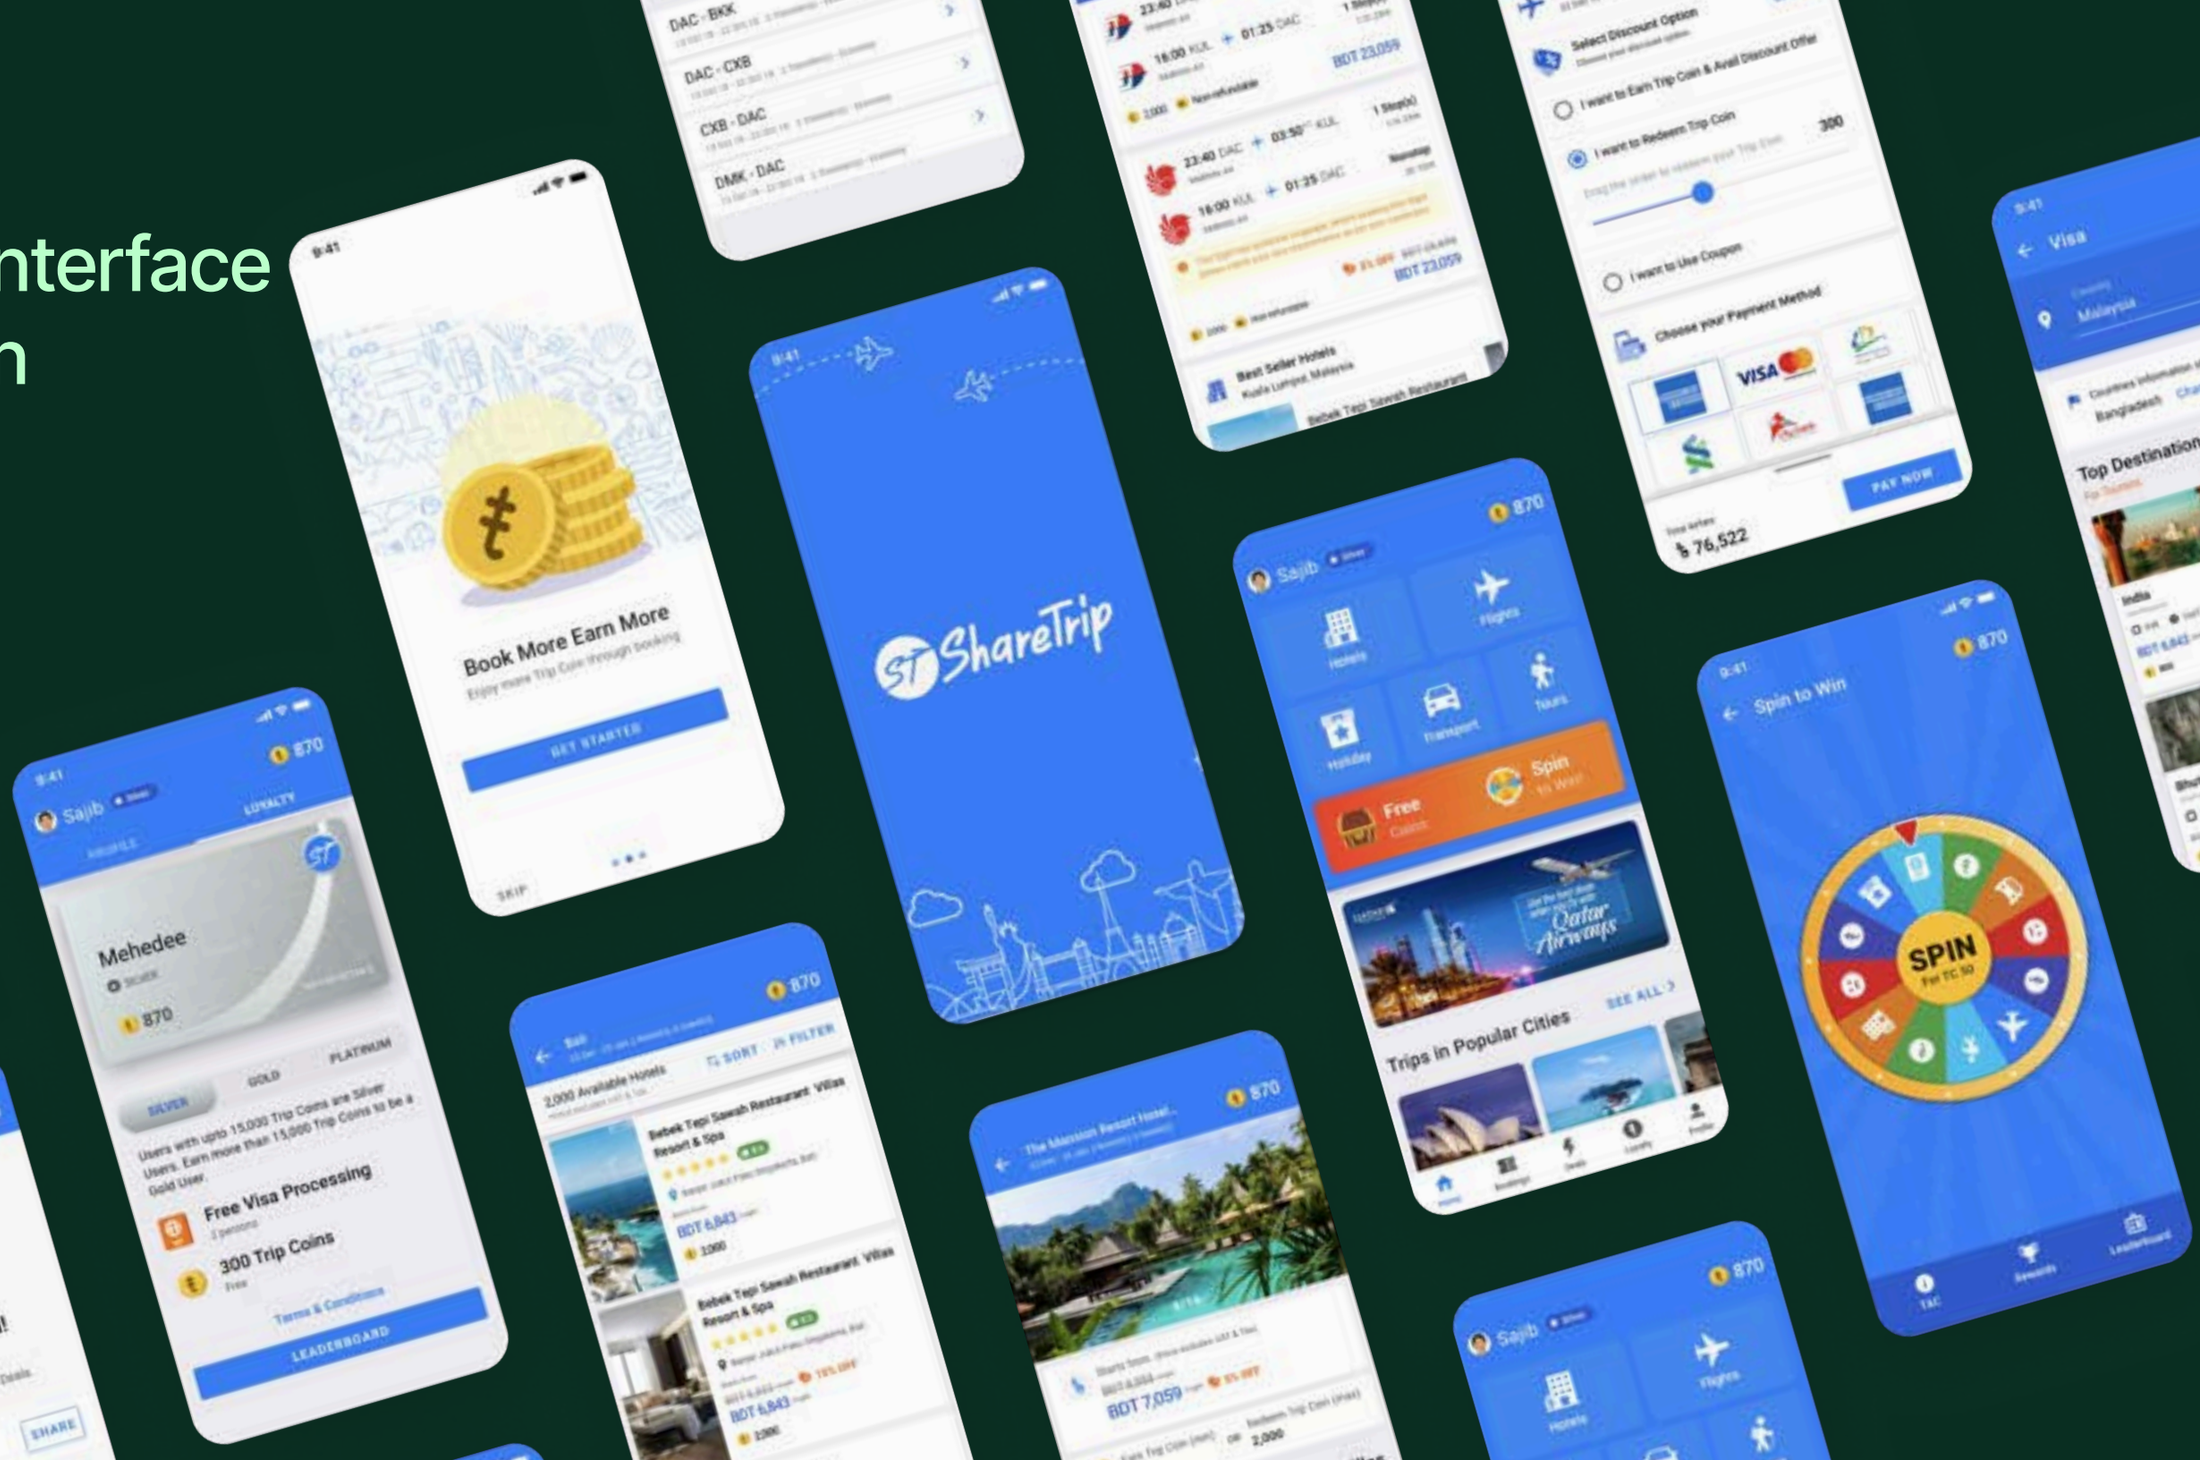

UI Design

User Interface Design

UX Design | Test & Validated

User Testing

We conducted three smaller in-person user testing sessions.

The goal was to assess the overall usability of the app and identify areas for improvements that could facilitate the completion of the tasks.

UI Design

Refine & Deploy

We refined the design and created deliverables for development hand-off.

- Prepared design documentations
- write user stories
- Shared the UI screens to Zeplin
- Maintained a close communication with the team
- Unit testing sessions with the demos

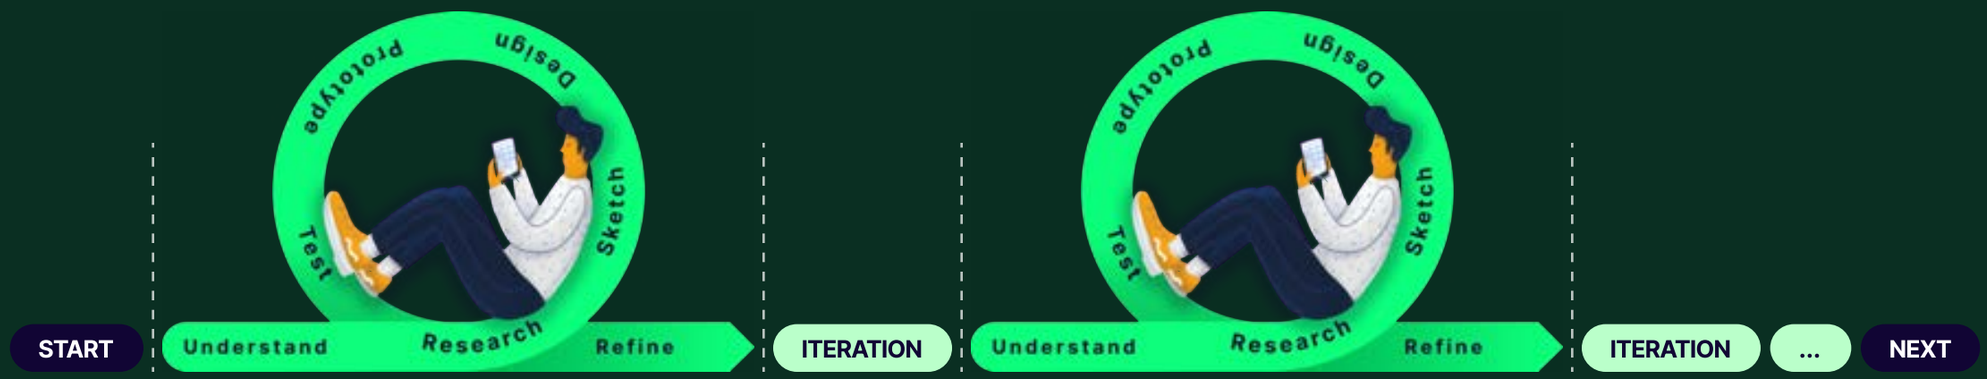

Results & Future vision

Validation & Future Iteration

We've monitored and measured the results for the first 6 months.

- The booking experience was seamless and intuitive & the **success rate was 76%**.
- The gamification helps us to get more of our users revisit. It was **55% of the user**.
- Our online booking was increased by 25%.

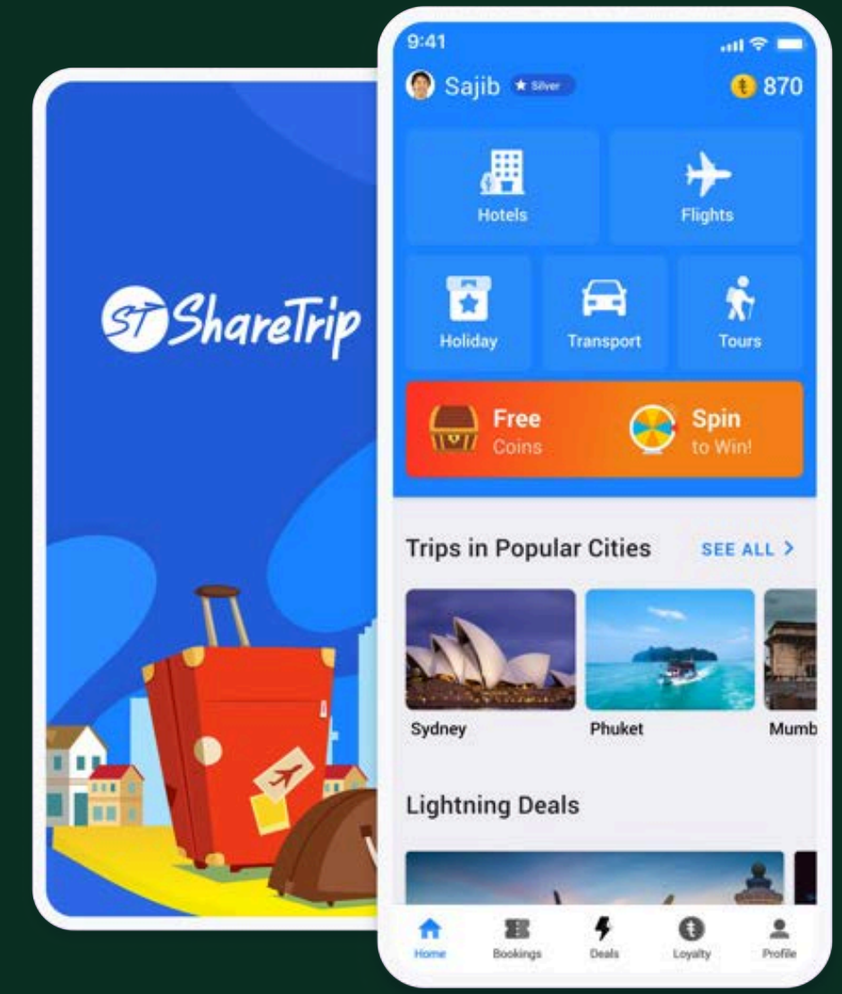

Takeaways

What I have learned

I’ve experienced how to design a product and its life cycle and creating a well-functioning app from scratch.

- I’ve mastered digging into people’s consumer minds.
- I learned quickly that inviting the right participants is crucial for getting valuable results from the usability testing sessions.
- I also discovered the mistakes and fixed them.

Thank you
