Anamoul Rouf

Product Designer – UX Strategy & Problem Solving

anamoulrouf.bd@gmail.com anamoulrouf.com linkedin.com/in/roufuxdesigner anamoulrouf.com/portfolio

I'm a Senior Product Designer with over 8 years of experience creating **intuitive, functional, scalable, user-centred** digital experiences across **travel, logistics, health tech, e-commerce, SaaS and gaming**. Skilled in UI/UX design, design systems, user research, and product strategy, with proven record of boosting retention, cutting delivery time, and improving conversion rates. Strong collaborator who balances user needs with business goals, and thrives in global, fast-paced product environments.

HIGHLIGHTS:

- 🏆 Designed **SaaS and e-commerce platforms** for global clients, focusing on **scalable design systems** and **conversion-driven user experiences**.
- 🎯 Partnered with product & engineering leaders to align **design decisions with company OKRs**, accelerating delivery and impact. Balance of craft (pixel-perfect execution) and strategy (roadmap and discovery workshops).
- 📈 Solved usability bottlenecks that **boosted task success and retention by 50%+** through structured testing loops.
- 🚀 Built and scaled **5+ design systems**, improving design-to-dev **efficiency by 20–25%** and ensuring consistency across multiple platforms. Expertise in design systems, scalable UI kits, and pattern libraries to drive consistency across complex ecosystems.
- 📲 Delivered **8+ mobile apps, 15+ web platforms**, and **35+ websites**, balancing usability with business KPIs.
- 👥 **Mentored and coached** junior designers, led hiring processes, and scaled design teams in high-growth startups.

WORK HISTORY:

CES (Continental Expedited Services), Sr. Product Designer (Remote) (from May 2024 – Present)

- Reimagined **data-heavy dashboards and order management workflows** for carriers, customers, and internal executives in the **TMS** system.
- Applied UX research to design features that balanced **business efficiency with user accessibility**.
- Led **end-to-end UX strategy** for enterprise operations tools, from discovery research through delivery.
- Built CES's first **enterprise-wide design system**, cutting developer handoff time by 35% and unifying design across 4 logistics products.

Playground Labs, Sr. Product Designer (Remote) (from OCT 2022 to OCT 2023)

- Designed token **dashboards and staking flows**, **improving onboarding flow efficiency** for blockchain products.
- Established and maintained multi-product design systems, ensuring scalable UI consistency.
- Created **data-driven user journeys** that improved adoption and engagement.

Curogram, Product Designer (Remote) (from APR 2022 to AUG 2022)

- Designed patient-facing and provider **(B2C & B2B)** workflows with a **focus on compliance, accessibility, and trust** by following **HIPAA standards**.
- **Improved usability** of scheduling and communication flows, helping medical teams save time and simplifying engagement with data driven approach.
- **Collaborated with engineers** to implement **scalable design systems** and reduce interface complexity.

Truck Lagbe Limited, Product Design Manager (Dhaka, Bangladesh) (from MAY 2021 to MAY 2022)

- Managed a **5-member design team** delivering apps and portals for 2M+ users. Led the design process for B2C, B2B, & SaaS products.
- **Usability Testing** loop boosted **trip completions by 35%**; driver app updates cut **fraud by 30%**.
- Introduced component libraries in Figma, **reducing repetitive work and accelerating prototyping,** raising team output by 25%.

ShareTrip Inc., Sr. Product Designer (Dhaka, Bangladesh) (from SEP 2018 to APR 2021)

- Redesigned **end-to-end booking flows**, simplifying a **complex e-commerce journey** into an intuitive experience that **increased conversions**. Led the design process for B2C, B2B, & SaaS products.
- Partnered with stakeholders to align design solutions with **business KPIs and user research insights**.
- Embedded **usability testing** loops, raising task **success rate by 54%** and **retention by 56%**.
- Designed **B2C, B2B, and admin portals**, guided by analytics and KPIs. Established a **design system** ensuring **visual and functional consistency across web and mobile apps**.

I've also worked for others products like - JoBike, Workd, Beatnik, Portwallet, ThemeXpert, Berger Paitns, Bengal Meat, Banglalink, G&R, Pimjo Labs.

EDUCATION & CERTIFICATIONS:

- **Bachelor in Business Studies (BBS)** – National University, Bangladesh
- **UX Certifications:** UX Design Fundamentals (CalArts), Design Thinking for Innovation (UVA Darden), Gamification (UPenn), Usability Testing (IxDF), User Experience (UX) Design (Google Career Certificates), Human-Centered Design (UCSD).

CORE SKILLS:

- **Leadership & Strategy**: Design roadmaps, Product strategy, Stakeholder alignment, Agile Collaboration, End-to-End Product Design (Web & Mobile).
- **Execution:** UX Research, User Flows Mapping, Wireframes, Prototypes, High-fidelity UI, Micro-interactions, CRO, Usability Testing, A/B Testing.
- **Systems & Tools:** Design systems, Pattern libraries, Design OPS, Figma, FigJam, Notion, Miro, Zeplin, Adobe XD, ChatGPT, Grok.

Designing Travel App Experience from Scratch

Background

ShareTrip is the pioneer online travel aggregator (OTA) in Bangladesh. Initially, it was providing offline flights, hotels, and holiday package booking services.

Design Challenge

Our challenge was to design Android and iOS mobile applications from scratch, ensuring functionality, simplicity, intuitiveness, easy-to-use, conversion-friendly, and frictionless booking experience.

Outcome

- The success rate was 76% in the booking experience.
- 55% of the users revisit.
- Our online booking was increased by 25%.

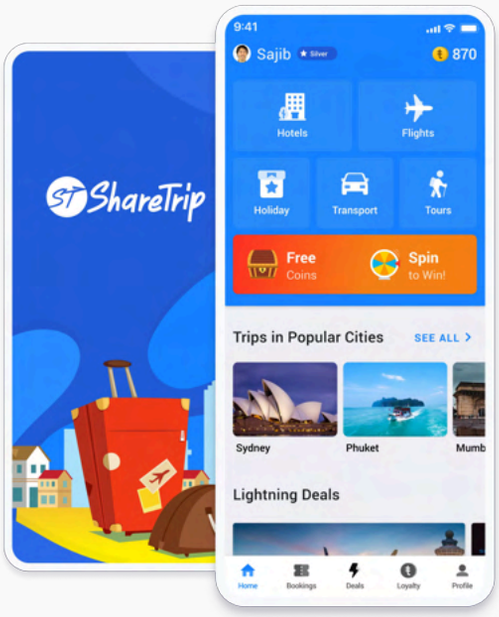

Project
ShareTrip Mobile Application

My Role
UX Research, UI/UX Design

Platform
iOS and Android.

Tools
Miro, Adobe XD, Zeplin, Figma, Notion, Jira.

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

Sick.ORG: Simplify Patient Communications

Background

Sick.org is a nationwide digital care platform aiming to make healthcare simple and accessible. It provides telemedicine services and at-home COVID-19 testing, tackling the gaps in affordable, convenient healthcare, especially during the pandemic.

Design Challenge

Accessing affordable and convenient healthcare has always been a challenge, but the COVID-19 pandemic amplified these difficulties, leaving many individuals and families struggling to find safe and accessible options for their health needs.

Outcome

Create a platform that provides direct access to telemedicine and COVID-19 testing, ensuring affordability, convenience, and a user-friendly experience for individuals with diverse healthcare needs.

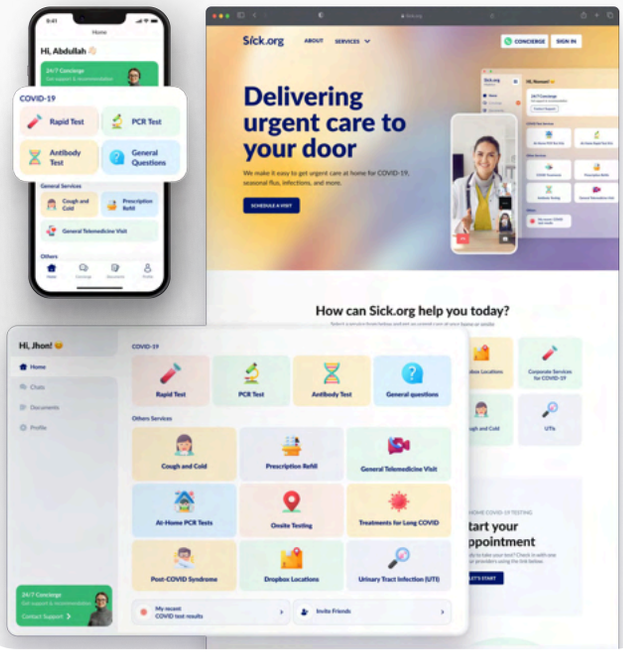

Project
A Mobile-First Health Care Platform for Sick.org Users

My Role
UX Research, UI/UX Design

Platform
Mobile & Web application.

Tools
Figma, FigJam, Notion.

Team Collaboration
Product, Growth, Support, and Tech.

KYS (Know Your Suppliers) ID Verification

Background

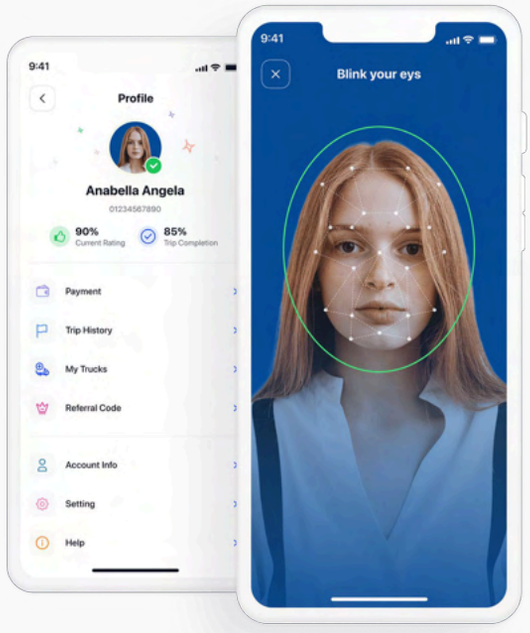

Truck Lagbe was facing operational difficulties verifying their delivery partners (truck owners, truck drivers, collaborators, transport agencies). Also, the trip Completion Rate (CR) is getting more challenging to control and the fraudulent cases.

Goal

- Get more supply partners re-verified.
- Make the verification process more efficient, functional and scalable.
- Have more control over fraudulent cases and trip Completion Rate (CR).

Outcome

- Re-verified around 92% of our existing supply partners.
- The fraudulent cases were reduced to around 30%.
- The trip Completion Rate (CR) increased by 35%.

Project
TL KYS Programme

Tools
Miro, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

Platform
iOS and Android.

An AI Powered Web Application for Multi-vendor E-commerce Solution

Challenges

The multi-vendor e-commerce landscape is evolving, and AI is the game-changer here. This platform aims to simplify and enhance the buying and selling process. Our main challenge was to design a web application which empower sellers, delight buyers, enhance buyer & seller communication and leverage insights.

- Increase in the number of active sellers by simplifying product upload processes.
- Improved buyer engagement through personalised recommendations and faster search results.
- Higher conversion rates due to optimised pricing and detailed product descriptions.
- Adoption rate of hybrid dashboards by multi-role users (buyers/sellers).
- Positive user feedback on the messaging and notification features.

Project
Web Application for Multi-vendor E-commerce Solution

Tools
Miro, Chat GPT, Jira, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, Support, and Tech.

Platform
Web Application (Hybrid)

Redefining Jo-Credit Recharge

Background

Jobike is an app-based station less bicycle-sharing services, provides an eco-friendly solution for mobility and healthy lifestyles. The users can enjoy their ride by using Jo-Credit Balance and get recharege from only the nearest JoPoints.

Goal

Our main challenge was implementing the Online Recharge process for our users to get their Jo-Credit Balance recharge from home. Besides, the existing recharge process was creating some crucial problems.

- Make more efficient Online recharge process.
- Secure the users' privacy.

Outcome

- Online recharge increased by 65%.
- We secured the users' privacy.

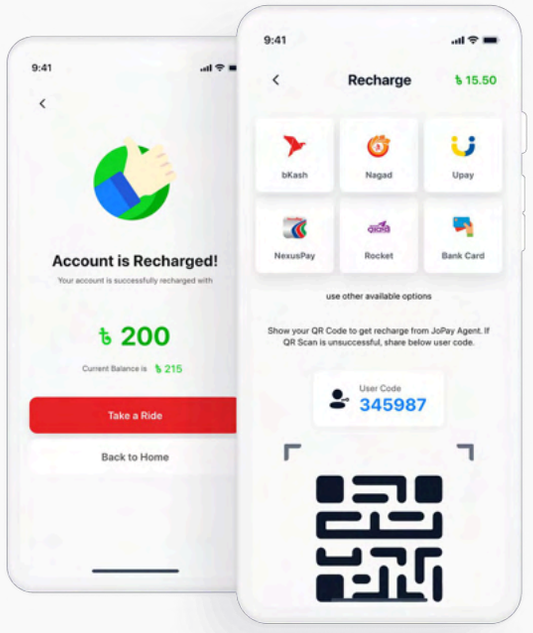

Project
Jobike User App & JoPoint App Redesign

Tools
Miro, Jira, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

Platform
Android App.

A Browser-base Online Gaming Platform for Web3 Gamers

Challenges

KAP Games is a web3 gaming distributor, publisher & studio, specializing in browser and mobile-native experiences. Our challenge was to design the web platfrom experience from scratch. The newly designed and developed platfrom should be functional, simple, intuitive, innovative, easy to use, and most importently seamless gaming experience.

- Designed token dashboards and staking flows, improving onboarding flow efficiency for blockchain products.
- Established and maintained multi-product design systems, ensuring scalable UI consistency.
- Created data-driven user journeys that improved adoption and engagement.

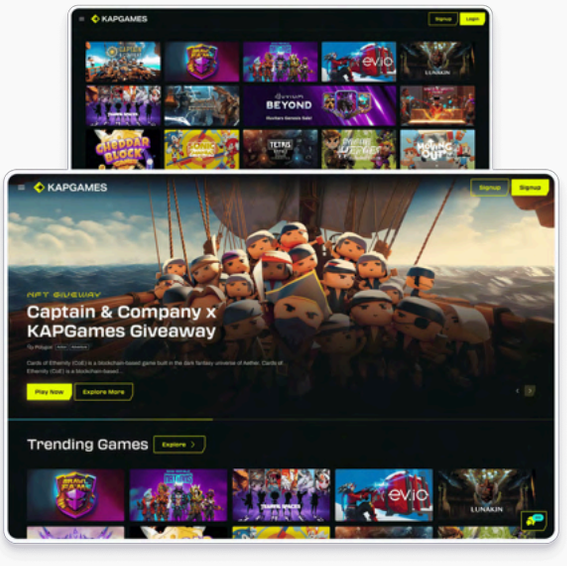

Project
KAP Games Web Platform

Tools
Miro, Chat GPT, Jira, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, and Tech.

Platform
Web Application (Hybrid)

A Real-time AQI App (Air Quality Index) with Weather Forecast

Challenges

AirQI provides real-time and forecast air pollution and weather data. Our main challenge is to design a hybrid app that provides an intuitive customize experience to its users. Our main challenge was to design a web app that facilitates its users to know about air quality and weather information.

- It has to be easily used by non-tech people.
- Users can get air quality and weather updates through notifications for saved & current locations.
- Users can get air quality and weather forecast.
- Users can also request air quality information data.

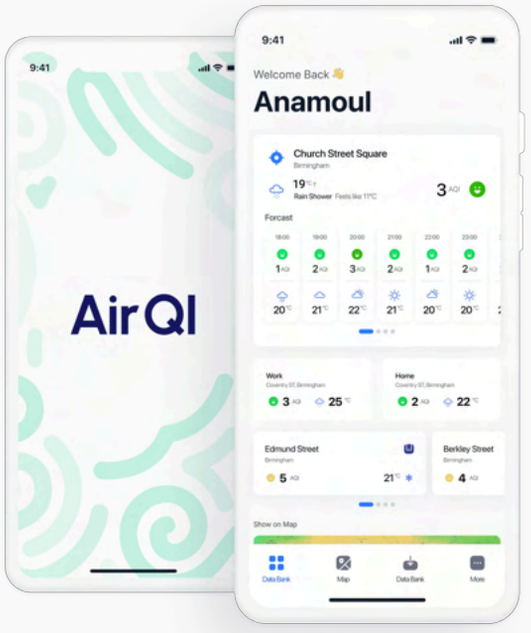

Project
AirAQ Mobile App & Web App

My Role
UX Research, UI/UX Design

Platform
Web Application (Hybrid)

Tools
Miro, Chat GPT, Linner, Figma, Notion, Figjam.

Team Collaboration
Product, Business, and Tech.

Designing User Friendly Logistics Systems With AI

Challenges

We're shaping logistics systems at Continental Expedited Services (CES), focusing on usability and cutting-edge tech, excited to push design boundaries further. Our goal is to enhance freight movement efficiency with cutting-edge tech, and I'm excited to keep pushing design boundaries, ensuring our products are both functional and delightful for users.

- Reimagined data-heavy dashboards and order management workflows for carriers, customers, and internal executives in the TMS system.
- Applied UX research to design features that balanced business efficiency with user accessibility.
- Led end-to-end UX strategy for enterprise operations tools, from discovery research through delivery.
- Built CES's first enterprise-wide design system, cutting developer handoff time by 35% and unifying design across 4 logistics products.

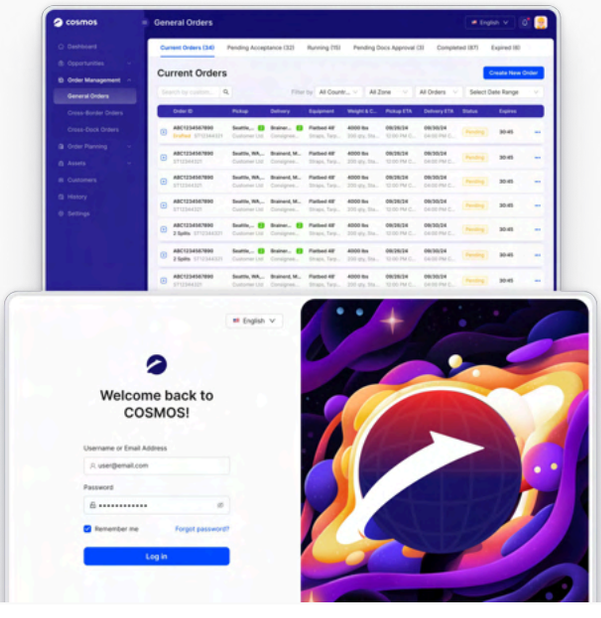

Project
COSMOS Web Application

My Role
UX Research, UI/UX Design

Platform
Web Application (Hybrid)

Tools
Miro, Chat GPT, Jira, Figma, Notion, Figjam.
