Anamoul Rouf

Senior Product Designer, Travel Tech, B2B, B2C, SaaS, Operational Systems
anamoulrouf.bd@gmail.com anamoulrouf.com linkedin.com/in/roufuxdesigner anamoulrouf.com/portfolio

I'm a Senior Product Designer with **8+ years of experience** designing **enterprise, SaaS, healthcare, logistics, and AI-powered digital products**. I'm experienced in user research, usability testing, information architecture, wireframing, prototyping, responsive UI design, and design systems.

I'm passionate about **simplifying complex business processes into intuitive digital solutions** and end-to-end product execution, while collaborating closely with **product, engineering, and business stakeholders**.

WHAT I BRING

- 8+ years of Product Design and UX experience across SaaS, enterprise, healthcare, logistics, and AI products. Experienced in **simplifying complex workflows into intuitive user experiences**.
- Strong experience conducting **user research, usability testing, and translating insights** into product decisions.
- Designed **end-to-end web and mobile experiences** from discovery to developer handoff.
- Built and maintained **scalable design systems** and reusable component libraries in Figma.
- Worked closely with **Product Managers, Engineers, and business stakeholders** in agile teams.
- Strong background in responsive, accessible UI design and interaction design.
- Experienced in digital transformation initiatives and enterprise workflow optimization.
- Comfortable creating **user flows, wireframes, prototypes, and detailed UI** specifications.

WORK HISTORY

CES (Continental Expedited Services), **Sr. Product Designer** (Remote) (from May 2024 – Present)

- Designing **complex SaaS and operational products** used by enterprise customers.
- Lead **end-to-end design** from discovery to production-ready UI. Build scalable design patterns and reusable components to maintain consistency across products.
- Collaborate closely with **product managers and engineers in remote environments**. Drive usability improvements through research, feedback loops, and iteration.
- Use **AI-assisted workflows to speed up** ideation, content exploration, and early prototyping.

Curogram, **Product Designer** (Remote) (from APR 2022 to AUG 2022)

- Designed healthcare web and mobile applications for **patients, providers, and administrators** for **healthcare providers to manage patient communication**, scheduling, forms, and operational workflows.
- **Simplified complex healthcare processes** into intuitive user experiences for providers and patients.
- Conducted user research, wireframing, prototyping, and high-fidelity UI design. Contributed to design systems and reusable UI components.
- Collaborated closely with engineering and stakeholders to ship scalable product experiences.

Truck Lagbe Limited, **Product Design Manager** (Dhaka, Bangladesh) (from MAY 2021 to MAY 2022)

- Designed products across **logistics, booking, and operational workflows**.
- Worked on both customer-facing and operational interfaces.
- Simplified data-heavy and multi-step experiences into efficient workflows.
- Partnered with product and engineering teams throughout the product lifecycle.

ShareTrip Inc., **Sr. Product Designer** (Dhaka, Bangladesh) (from SEP 2018 to APR 2021)

- Led end-to-end design for hotel and flight booking experiences across web and mobile.
- Simplified multi-step booking journeys to reduce friction and improve conversion.
- Conducted user research, usability testing, wireframing, prototyping, and UI design.
- Worked closely with product and engineering teams throughout implementation.

Business Impact:

76% booking success rate. 55% revisit rate. 25% increase in online bookings.

I've also worked for others products like - Playground Labs, Truck Lagbe, JoBike, Workd, Beatnik, Portwallet, ThemeXpert, Berger Paitns, Bengal Meat, Banglalink, G&R, Pimjo Labs.

EDUCATION & CERTIFICATIONS:

- **Bachelor in Business Studies (BBS)** – National University, Bangladesh
- **UX Certifications:** UX Design Fundamentals (CalArts), Design Thinking for Innovation (UVA Darden), Gamification (UPenn), Usability Testing (IxDF), User Experience (UX) Design (Google Career Certificates), Human-Centered Design (UCSD).

CORE EXPERTISE

Product Design:

- User Research & UX Strategy
- AI-assisted Design Workflow
- Product Thinking & Systems Thinking
- Complex Workfolws
- IA with User Journey Mapping
- Wireframing & Prototyping
- High-Fidelity UI Design
- Usability Testing
- Adaptive & Responsive Design for Web & Mobile Platform

SaaS & Enterprise Systems:

- Dashboard Design
- Analytics Interfaces
- Operational Workflows
- Admin Platforms
- Multi-role Systems
- B2C, B2B, SaaS and operation system.

Design Systems:

- Reusable Component Libraries
- Auto Layout
- Manage Variables & Tokens
- Design Governance
- Scalable UI Architecture

Engineering Collaboration:

- Developer Handoff
- Design QA
- Responsive Design
- Cross-functional Collaboration
- Front-end Constraints
- Async Remote Collaboration

+ More

SYSTEMS & TOOLS

Expert:

- Figma
- Design Systems
- Prototyping
- UX Documentation

Working Knowledge:

- HTML
- CSS
- Responsive Design
- Front-end Collaboration

+ More

SELECTED PROJECTS

- ShareTrip: Travel Booking Platform
- Truck Lagbe: Logistics Marketplace

+ More

Designing Travel App Experience from Scratch

Background

ShareTrip is the pioneer online travel aggregator (OTA) in Bangladesh. Initially, it was providing offline flights, hotels, and holiday package booking services.

Design Challenge

Our challenge was to design Android and iOS mobile applications from scratch, ensuring functionality, simplicity, intuitiveness, easy-to-use, conversion-friendly, and frictionless booking experience.

Outcome

- The success rate was 76% in the booking experience.
- 55% of the users revisit.
- Our online booking was increased by 25%.

Project
ShareTrip Mobile Application

My Role
UX Research, UI/UX Design

Platform
iOS and Android.

Tools
Miro, Adobe XD, Zeplin, Figma, Notion, Jira.

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

Sick.ORG: Simplify Patient Communications

Background

Sick.org is a nationwide digital care platform aiming to make healthcare simple and accessible. It provides telemedicine services and at-home COVID-19 testing, tackling the gaps in affordable, convenient healthcare, especially during the pandemic.

Design Challenge

Accessing affordable and convenient healthcare has always been a challenge, but the COVID-19 pandemic amplified these difficulties, leaving many individuals and families struggling to find safe and accessible options for their health needs.

Outcome

Create a platform that provides direct access to telemedicine and COVID-19 testing, ensuring affordability, convenience, and a user-friendly experience for individuals with diverse healthcare needs.

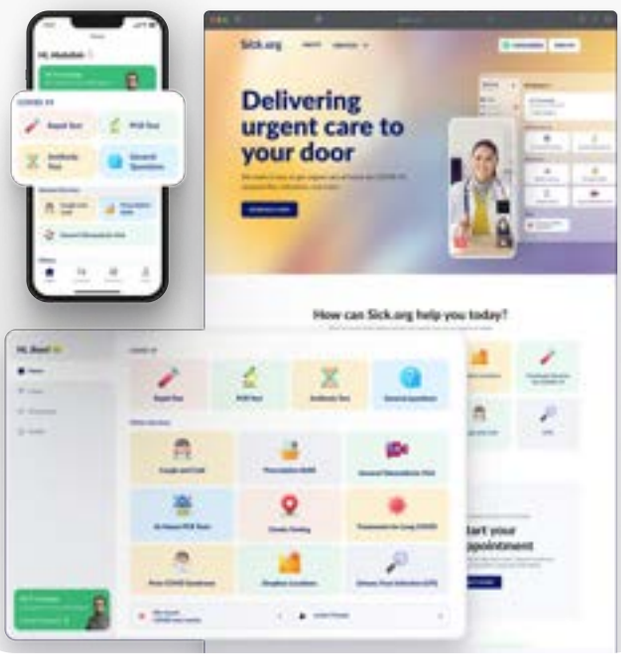

Project
A Mobile-First Health Care Platform for Sick.org Users

My Role
UX Research, UI/UX Design

Platform
Mobile & Web application.

Tools
Figma, FigJam, Notion.

Team Collaboration
Product, Growth, Support, and Tech.

KYS (Know Your Suppliers) ID Verification

Background

Truck Lagbe was facing operational difficulties verifying their delivery partners (truck owners, truck drivers, collaborators, transport agencies). Also, the trip Completion Rate (CR) is getting more challenging to control and the fraudulent cases.

Goal

- Get more supply partners re-verified.
- Make the verification process more efficient, functional and scalable.
- Have more control over fraudulent cases and trip Completion Rate (CR).

Outcome

- Re-verified around 92% of our existing supply partners.
- The fraudulent cases were reduced to around 30%.
- The trip Completion Rate (CR) increased by 35%.

Project
TL KYS Programme

Tools
Miro, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

Platform
iOS and Android.

An AI Powered Web Application for Multi-vendor E-commerce Solution

Challenges

The multi-vendor e-commerce landscape is evolving, and AI is the game-changer here. This platform aims to simplify and enhance the buying and selling process. Our main challenge was to design a web application which empower sellers, delight buyers, enhance buyer & seller communication and leverage insights.

- Increase in the number of active sellers by simplifying product upload processes.
- Improved buyer engagement through personalised recommendations and faster search results.
- Higher conversion rates due to optimised pricing and detailed product descriptions.
- Adoption rate of hybrid dashboards by multi-role users (buyers/sellers).
- Positive user feedback on the messaging and notification features.

Project
Web Application for Multi-vendor E-commerce Solution

Tools
Miro, Chat GPT, Jira, Figma, Notion, Figjam.

My Role
UX Research, UI/UX Design

Team Collaboration
Product, Marketing, Support, and Tech.

Platform
Web Application (Hybrid)

Redefining Jo-Credit Recharge

Background

Jobike is an app-based station less bicycle-sharing services, provides an eco-friendly solution for mobility and healthy lifestyles. The users can enjoy their ride by using Jo-Credit Balance and get recharege from only the nearest JoPoints.

Goal

Our main challenge was implementing the Online Recharge process for our users to get their Jo-Credit Balance recharge from home. Besides, the existing recharge process was creating some crucial problems.

- Make more efficient Online recharge process.
- Secure the users' privacy.

Outcome

- Online recharge increased by 65%.
- We secured the users' privacy.

Project
Jobike User App & JoPoint App Redesign

My Role
UX Research, UI/UX Design

Platform
Android App.

Tools
Miro, Jira, Figma, Notion, Figjam.

Team Collaboration
Product, Marketing, Sales, Customer Support, and Tech.

A Real-time AQI App (Air Quality Index) with Weather Forecast

Challenges

AirQI provides real-time and forecast air pollution and weather data. Our main challenge is to design a hybrid app that provides an intuitive customize experience to its users. Our main challenge was to design a web app that facilitates its users to know about air quality and weather information.

- It has to be easily used by non-tech people.
- Users can get air quality and weather updates through notifications for saved & current locations.
- Users can get air quality and weather forecast.
- Users can also request air quality information data.

Project
AirAQ Mobile App & Web App

My Role
UX Research, UI/UX Design

Platform
Web Application (Hybrid)

Tools
Miro, Chat GPT, Linner, Figma, Notion, Figjam.

Team Collaboration
Product, Business, and Tech.
